## FORORD.

Fiskeristatistikkens årgang 1923 fremlegges i alt vesentlig i samme form som årgangen 1922. De samme innskrenkninger som blev foretatt i tabellverket i årgangen 1922 er også gjort i nærværende årgang.

Man gjør opmerksom på at opgavene over trandamperier — hvilke opgaver er hentet fra Industristatistikken — kun omfatter sådanne som anvender kjeler med trykk.

Med hensyn til de statistiske opgaver vedrørende flyndrefisket viser det sig at disse på grunn av dette fiskes raske utvikling i de sidste år ikke er så god som ønskelig kunde være. Det er som bekjent anvendelsen av flyndrenoten som har forårsaket den store økning av dette fiskes avkastning. Tallene over eksporten for de siste år viser best den store vekst i fisket:

|                 |             |
|-----------------|-------------|
| 1922 eksportert | 78 347 kg.  |
| 1923 „          | 756 162 „   |
| 1924 „          | 2 175 103 „ |

I lensmennesenes fiskeristatistiske opgaver for Troms fylke er anført at der i 1923 blev fisket 1 200 kg. mens opgavene for Finnmark fylke intet angir om flyndrefisket. Efter anstillede undersøkelser viser det sig imidlertid at man kan anta at der i 1923 i Troms fylke blev fisket minst 30—40 000 kg. og i Finnmark fylke ca. 162 500 kg. At disse tall ikke er kommet med i lensmennesenes opgaver og heller ikke i fiskeristatistikken er meget beklagelig. Men sådan som forholdene ligger an for tilveiebringelsen av de fiskeristatistiske opgaver fra kjøpere og tilvirkere må det innrømmes at det er vanskelig for lensmennene å få riktige og fullstendige opgaver. Et lovforslag med bestemmelser om opgaveplikt etc. i fiskeristatistisk øiemed er under behandling.

Fiskeridirektørens kontor, Bergen 16. juni 1925.

Asserson.

---

Feil og rettelser.

I årgangen 1922:

Side 2, linje 12 fra oven står 9 464, skal være 9 064.

# Oversikt over Norges fiskerier 1923.

## Det samlede verdiutbytte.

På grunnlag av de på fiskeplassene betalte priser utgjorde den samlede verdi kr. 77 506 820.

Tidligere blev de egentlige kystfiskerier opført for sig, og bankfisket fra Romsdalsbyene, Nordsjøsildfisket, dorgemakrellfisket i Nordsjøen og den fra Island hjemførte sild og torsk underrett for sig. Denne utskilling av bankfisket fra Romsdalsbyene kan dog ikke sees å ha nogen interesse, særlig da der jo også drives bankfiske annetstedsfra, som ikke har vært regnet fra i summen av kystfiskerienes utbytte. Derimot kan det ha sin interesse å utskille de verdier som vinnes ved fiske utenfor norske farvann — altså vesentlig i Nordsjøen og ved Island. I nedenstående tabell er nevnte sonndring gjennomført for de siste 10 år.

Ennvidere bør i anledning av det samlede utbytte bemerkes at årgangen 1913 innførte den skikk ikke å medregne endel mengder og verdier tilført Oslo, Bergen og Stavanger, fordi disse mengder og verdier derved utvilsomt vilde bli medtatt to ganger. Dette gjaldt hele tilførselen til Oslo, likeså til Bergen dog undtatt Islandssild, Nordsjøsild og Islandstorsk, og for Stavangers vedkommende hummer og laks. Denne ordning gjelder fremdeles undtatt for Oslos vedkommende, idet man på denne by fra og med året 1918 kun vil opføre det utbytte som med overveiende sannsynlighet må antas ikke å være ilandbragt annetsteds. De på Oslo opførte tall vil med undtagelse av laks og sjørret derfor bli tatt med i det samlede utbytte.

I foranstående tabell er i overensstemmelse med det forannevnte den nødvendige reduksjon foretatt forsåvidt de siste 10 år angår. Verdiutbyttet i 1913 blir da ikke som anført i årgangen 1913 det tredje største, men det allerstørste inntil da opnådde.

Det fremgår av tabellen at verdiutbyttet av saltvannsfiskeriene når høiest i 1916.

Med hensyn til gjennomsnittsberegningen så er denne for mengdeutbyttets vedkommende utført for 10-årsperioden 1914—23. En analog fremgangsmåte når det gjelder verdiutbyttet har ingen hensikt på grunn av de store forskyvninger i pengenes verdi. Man har imidlertid opført gjennomsnittsverdien for årene 1910—1914. Året 1914 er medtatt, da forholdene i dette år hvad fiskeriene angår i det væsentlige har vært normale. — Verdiutbyttet er for hvert av de efterfølgende år angitt i pct. av den opførte gjennomsnittsverdi, hvorved den nominelle verdistigning under og etter krigen vil kunne sees.

Det her anførte er gjort gjeldende for samtlige 10-årsoversikter i nærværende årgang.

I ovenstående tall er ikke medregnet fiskernes forbruk av egen fangst. Se herom tab. 10 og s. 39\*.

<sup>1)</sup> Fiskernes forbruk av egen fangst ikke medregnet. <sup>2)</sup> Island, Nordsjøen, Færøene. <sup>3)</sup> Heri medtatt verdiutbyttet av bottlenose- eller nebbhvalfangsten.

<sup>1)</sup> Vekten av de sorter som oppgis i hl. eller stykketall er angitt som om 1 hl eller 1 tønne var = 100 kg. 1 makrell =  $\frac{1}{3}$  kg. 1 hummer fra Vestlandet = 0.5 fra Sør- og Østlandet = 0.4 kg., 1 krabbe =  $\frac{1}{2}$  kg., 1 ål =  $\frac{1}{4}$  kg., 1 hornkjell =  $\frac{1}{2}$  kg., 1 liter reker =  $\frac{1}{2}$  kg., 1000 stk. østers = 1 hl., 2000 stk. skjell = 1 hl., 1 skrei = 3.5 kg. fra Sør-Trøndelag fylke og sydover, 3.3 kg. fra Nord-Trøndelag og Nordland, og 2.7 kg. for Troms og Finnmark. <sup>2)</sup> Herav 13 741 ton av skrei og loddetorsk. I 1916 og tidligere blev lever tatt med under „andre“. <sup>3)</sup> gullflyndre, kongeflyndre.

Det samlede mengde- og verdiutbytte av de norske saltvannsfiskerier fordeler sig på hver fiskeart som vist i foranstående tabeller hvor der for året 1923 er medtatt alle de arter om hvilke spørreskjemaene for dette år inneholdt spørsmål. For tidligere år enn 1914 spurtes ikke om (1) tareaske, (2) lyr, (3) blåskjell, (4) piggvar og (5) skate.

Nedenstående figur viser bevegelsen i gjennomsnittlig pris for alle fiskesorter underrett for hver av de fire kyststrekninger og for hele kysten.

Nedenstående figur viser bevægelsen i opfisket mængde av alle fiskearter 1914—1923 for de 4 kyststrekninger og for hele kysten.

Følgende tabell viser bevægelsen i pengeverdi av de 5 viktigste fiskearter for årene 1914—1923.

<sup>1)</sup> Ikke alle tilførsler til Stavanger er medregnet. Se side 9\*.

<sup>2)</sup> I 1921 og tidligere år er fylkets to fogderier, Mandal og Lister, anført under henholdsvis Skagerakkysten og Nordsjøens kyst.

Følgende tabell viser bevegelsene i opfisket mengde, verdi og gjennomsnittspris av alle fiskesorter for de større kyststrekninger for årene 1914—1923.

| Kyststrekning     | År               | Mengde  |                   | Verdi    |                   | Pris pr. kg. |                            |

## Deltagelsen i fiskeriene.

### Fiskerne.

Efter lensmennenes opgaver var der i 1923 ialt 102 232 fiskere, hvorav 25 349 drev fiske som eneste erhverv, 39 478 som hovederhverv og 37 505 som bierhverv. Av personer som deltok i fiskens tilvirkning til handelsvare var der 18 013 og av arbeidere ved hermetikk-, sildolje-, guanofabrikker o. l. — 7 883.

Riksforsikringsanstaltens statistikk vedr. ulykkesforsikringen for fiskere for året 1923 foreligger ennå ikke. De opplysninger fra denne

statistikk som pleier å være tatt inn under dette avsnitt, er derfor i nærværende årgang utelatt.

Nedenfor gis imidlertid en oversikt over antallet av „godkjente“ ulykker, deres følger og de tilkjente erstatninger i årene 1913—1922:

| År            | Ulykker |       | Derav |        | Erstatning<br>kroner | Antall etterlatte |                     |       |
|---------------|---------|-------|-------|--------|----------------------|-------------------|---------------------|-------|
|               | antall  | %     | døde  | drukn. |                      | enker             | barn under<br>15 år | andre |
| 1913. . . . . | 297     | 0.332 | 187   | 172    | 200 900              | 82                | 184                 | 138   |
| 1914. . . . . | 270     | 0.308 | 151   | 134    | 162 100              | 76                | 163                 | 105   |

| 1917. . . . . | 217     | 0.234 | 128   | 113    | 269 700              | 73                | 198                 | 94    |
| 1918. . . . . | 141     | 0.149 | 82    | 61     | 172 500              | 49                | 133                 | 49    |
| 1919. . . . . | 165     | 0.174 | 86    | 66     | 173 514              | 38                | 113                 | 66    |
| 1920. . . . . | 203     | 0.217 | 127   | 118    | 241 547              | 63                | 145                 | 93    |
| 1921. . . . . | 189     | 0.207 | 108   | 95     | 600 231              | 58                | 148                 | 92    |
| 1922. . . . . | 198     | 0.223 | 106   | 91     | 632 623              | 57                | 147                 | 73    |

Her følger en tabell over drukkingsulykkenes fordeling på årstidene:

| År             | 1. kv. | 2. kv. | 3. kv. | 4. kv. | Ialt       |
|----------------|--------|--------|--------|--------|------------|
| 1913 . . . . . | 53     | 44     | 21     | 54     | <b>172</b> |
| 1914 . . . . . | 55     | 33     | 11     | 35     | <b>134</b> |
| 1915 . . . . . | 30     | 27     | 14     | 20     | <b>91</b>  |
| 1916 . . . . . | 20     | 15     | 25     | 20     | <b>80</b>  |
| 1917 . . . . . | 65     | 15     | 8      | 25     | <b>113</b> |
| 1918 . . . . . | 19     | 15     | 11     | 16     | <b>61</b>  |
| 1919 . . . . . | 24     | 19     | 17     | 6      | <b>66</b>  |
| 1920 . . . . . | 84     | 11     | 6      | 17     | <b>118</b> |
| 1921 . . . . . | 18     | 37     | 19     | 21     | <b>95</b>  |
| 1922 . . . . . | 22     | 14     | 17     | 38     | <b>91</b>  |

### Deltagelsen i torskefiskeriene.

I de egentlige skreifiskerier deltok 50 193 mann, hvorav 3 175 i Finnmark fylke og i loddefisket deltok 15 254 mann, altså tilsammen 65 447 mann.

Deltagelsen i skreifiskeriene og i loddefisket i den siste 10-års periode fremgår av tabellen:

| År                   | Antall deltagere |             | Antall deltagere ialt |
|----------------------|------------------|-------------|-----------------------|
|                      | Skreifiskeriene  | Loddefisket |                       |
| 1914 . . . . .       | 62 477           | 31 762      | 94 239                |
| 1915 . . . . .       | 63 681           | 29 184      | 92 865                |
| 1916 . . . . .       | 63 591           | 18 901      | 82 492                |
| 1917 . . . . .       | 51 164           | 16 724      | 67 888                |
| 1918 . . . . .       | 47 625           | 16 628      | 64 253                |
| 1919 . . . . .       | 40 635           | 17 683      | 58 318                |
| 1920 . . . . .       | 48 007           | 15 674      | 63 681                |
| 1921 . . . . .       | 51 198           | 9 390       | 60 579                |
| 1922 . . . . .       | 54 300           | 18 294      | 72 594                |
| 1923 . . . . .       | 50 193           | 15 254      | 65 447                |
| Gjennemsnitt 1914—23 | 53 286           | 18 949      | 72 236                |

I nedenstående tabell er angitt den samlede deltagelse i skreifiskeriene og loddefisket for hvert 5 år fra 1876.

| År             | Antall deltagere | År             | Antall deltagere |
|----------------|------------------|----------------|------------------|
| 1876 . . . . . | 62 757           | 1900 . . . . . | 82 098           |
| 1880 . . . . . | 80 441           | 1905 . . . . . | 83 286           |
| 1885 . . . . . | 76 504           | 1910 . . . . . | 88 144           |
| 1890 . . . . . | 89 283           | 1915 . . . . . | 92 865           |
| 1895 . . . . . | 86 087           | 1920 . . . . . | 63 681           |

Til belysning av deltagelsen i de viktigste fiskeridistrikter (fylkesvis) i de siste 10 år hitsettes følgende tabell:

| År               | Møre   | Nordland | Finmark<br>(iberegnet loddefisket) |
|------------------|--------|----------|------------------------------------|
| 1914 . . . . .   | 11 692 | 27 961   | 37 832                             |
| 1915 . . . . .   | 13 438 | 24 766   | 35 126                             |
| 1916 . . . . .   | 11 998 | 29 943   | 23 573                             |
| 1917 . . . . .   | 13 806 | 21 639   | 19 047                             |
| 1918 . . . . .   | 11 823 | 19 629   | 19 338                             |
| 1919 . . . . .   | 10 823 | 14 158   | 21 427                             |
| 1920 . . . . .   | 11 084 | 14 587   | 20 834                             |
| 1921 . . . . .   | 11 448 | 19 883   | 13 189                             |
| 1922 . . . . .   | 10 068 | 19 203   | 24 511                             |
| 1923 . . . . .   | 9 031  | 20 817   | 18 429                             |
| Gj.snitt 1914—23 | 11 521 | 21 259   | 23 331                             |

Det må vel merkes at disse tall er noget for høie da de fleste fiskere under fisket flytter fra et opsynsdistrikt til et annet, ofte flere ganger og enkelte kan da bli tellet to ganger. Innsettelsen av motor i fiskefartøiene har i høi grad øket gyldigheten av denne innskrenkning i tallenes betydning.

## Deltagelsen i sildefiskeriene.

Herunder faller fetsildfisket, vårsildfisket, storsildfisket på Skagerakkysten, storsildfisket på Vestkysten, Nordsjø-sildefisket og sildefisket ved Island.

Over deltagelsen i de fire første av disse fiskerier har man opgaver for et lengere tidsrum. Nedenfor hitsettes en tabell over antall deltagere i de siste 10 år.

| År               | Fetsildfiskeriene | Vårsildfisket | Storsildfisket Vestkysten | Storsildfisket Skagerakkysten |
|------------------|-------------------|---------------|---------------------------|-------------------------------|
| 1914 . . . . .   | 18 443            | 10 868        | 8 108                     | —                             |
| 1915 . . . . .   | 20 870            | 11 955        | 8 425                     | —                             |
| 1916 . . . . .   | 22 384            | 5 206         | 11 035                    | —                             |
| 1917 . . . . .   | 12 989            | 18 907        | 15 347                    | 35                            |
| 1918 . . . . .   | 18 388            | 22 591        | 13 027                    | —                             |
| 1919 . . . . .   | 21 840            | 22 822        | 16 453                    | —                             |
| 1920 . . . . .   | 13 257            | 17 735        | 13 278                    | —                             |
| 1921 . . . . .   | 25 326            | 12 082        | 13 534                    | 2                             |
| 1922 . . . . .   | 20 530            | 14 390        | 10 816                    | —                             |
| 1923 . . . . .   | 19 638            | 18 437        | 7 807                     | 45                            |
| Gj.snitt 1914—23 | 19 367            | 15 499        | 11 783                    | —                             |

Deltagelsen i *fetsildfiskeriene* (tabell 8) har vekslet meget sterkt, således i 1895 47 658 mann og i 1905 8492 mann. Grunnen hertil er at forekomstene av fetsild langs kysten har vært i høi grad vekslende; enkelte år er silden helt uteblitt. I 1923 deltok 2 155 garnbåter med en besetning av 5 599 mann og enn videre 1 126 notlag med en besetning av 14 039 mann. Opgavene over deltagelsen i fetsildfiskeriene er noget mangelfulle. Særlig er dette en følge av usikkerheten med hensyn til om småsildfisket maa henregnes til fetsildfiske. Da småsildfiske ikke er noget selvstendig fiske nogetsteds, men i Møre fylke og sønnenfor drives sammen med brislingfisket og nordenfor Møre fylke sammen med fetsildfisket, bør de personer som driver småsildfiske telles sammen med brislingfiskerne — resp. fetsildfiskerne.

Følgende tabell belyser deltagelsen i fetsildfiskeriene gjennom et lengere tidsrum for hvert 5 år siden 1876:

| År             | Antall deltagere | År             | Antall deltagere |
|----------------|------------------|----------------|------------------|
| 1876 . . . . . | 48 831           | 1900 . . . . . | 20 705           |
| 1880 . . . . . | 35 130           | 1905 . . . . . | 8 492            |
| 1885 . . . . . | 33 008           | 1910 . . . . . | 27 024           |
| 1890 . . . . . | 29 804           | 1915 . . . . . | 20 870           |
| 1895 . . . . . | 47 658           | 1920 . . . . . | 13 257           |

Til nærmere belysning av deltagelsen fra de fylker hvor fetsildfiskeriene er foregått hitsettes følgende tabell:

| År               | Hordaland | Sogn og Fjordane | Møre  | Sør-Trøndelag | Nord-Trøndelag | Nordland | Troms | Finnmark |
|------------------|-----------|------------------|-------|---------------|----------------|----------|-------|----------|
| 1914 . . . . .   | —         | 86               | 2 296 | 5 170         | 100            | 10 250   | 516   | ?        |
| 1915 . . . . .   | —         | 150              | 601   | 2 120         | 1 976          | 7 284    | 8 683 | ?        |
| 1916 . . . . .   | —         | 630              | 1 077 | 2 228         | 1 399          | 11 856   | 4 679 | 942      |
| 1917 . . . . .   | 40        | 228              | 1 998 | 4 000         | 1 831          | 3 924    | 908   | —        |
| 1918 . . . . .   | 30        | ?                | 1 484 | 4 069         | 1 506          | 7 155    | 2 788 | 1 332    |
| 1919 . . . . .   | —         | 30               | 478   | 5 780         | 601            | 7 848    | 5 470 | 1 628    |
| 1920 . . . . .   | ?         | 198              | 781   | 3 640         | 1 325          | 3 523    | 3 430 | 360      |
| 1921 . . . . .   | 687       | 837              | 1 378 | 6 057         | 427            | 5 477    | 7 850 | 1 963    |
| 1922 . . . . .   | ?         | 56               | 1 023 | 4 494         | 750            | 4 742    | 7 672 | 1 772    |
| 1923 . . . . .   | 706       | 970              | 3 464 | 4 606         | 946            | 4 621    | 2 566 | 1 034    |
| Gj.snitt 1914-23 | —         | —                | 1 458 | 4 216         | 1 086          | 6 668    | 4 456 | —        |

Den opgivne deltagelse i *vårsildfisket* var i 1923 18 437 mann, derav som garnfiskere 11 295 med ialt 2 201 garnlag. Av notlag deltok 633.

*Storsildfisket* i Møre og Sør-Trøndelag fylker er et drivgarnsfiske. Der deltok i 1923 ialt 7 852 mann med 1 116 farkoster, mest motorskøiter og dampskibe.

### Deltagelsen i brislingfisket.

Sammen med brisling fiskes også musse så fisket burde kanskje retttest hete „brisling- og mussefisket“. Det drives med finmaskede nøter av mange typer fra Møre fylke til svenskegrensen, dog ubetydelig på strekningen fra Lister til Langesundsfjorden.

Den samlede deltagelse i 1923 var 7 533 mann, derav er 5 023 opgitt som snurpenotfiskere. Mere inngående spørsmål angående brislingfisket fantes ikke i skjemaene før 1914, men blev inntat i de senere utsendte. Besvarelsene er derfor noget uensartet men synes dog å være av stor interesse. Det deltagende antall notlag var 818, derav 502 snurpenotlag og 316 landnotlag.

De anførte tall må nok reduseres noget hvis man skal kunne få et korrekt inntrykk av deltagelsen i brislingefisket. Deltagerne flytter nemlig etter som brislingen forekommer i de forskjellige fjorder og strøk og det hender derfor ofte at samme fiskere blir tallet flere ganger.

## Deltagelsen i makrellfiskeriene.

Deltagelsen i *kystmakrellfiskeriene* i de siste 10 år og for hvert 5 år siden 1876 sees av følgende tabeller:

| År               | Antall deltagere | År    | Antall deltagere |
|------------------|------------------|-------|------------------|
| 1914.            | 3 898            | 1876. | 3 436            |
| 1915.            | 4 489            | 1880. | 3 719            |
| 1916.            | 3 503            | 1885. | 4 147            |
| 1917.            | 5 517            | 1890. | 3 335            |
| 1918.            | 6 016            | 1895. | 2 738            |
| 1919.            | 5 249            | 1900. | 2 741            |
| 1920.            | 4 406            | 1905. | 9 516            |
| 1921.            | 5 865            | 1910. | 5 400            |
| 1922.            | 7 481            | 1915. | 4 489            |
| 1923.            | 6 529            | 1920. | 4 406            |
| Gj.snitt 1914—23 | 5 295            |       |                  |

Følgende tabell viser deltagelsen fra forskjellige fylker i de siste 10 år:

| År                  | Østfold | Akershus | Vestfold | Telemark | Aust-Agder | Vest-Agder | Rogaland |
|---------------------|---------|----------|----------|----------|------------|------------|----------|
| 1914 . . . . .      | 340     | 133      | 854      | 318      | 332        | 427        | 1 353    |
| 1915 . . . . .      | 350     | 102      | 731      | 280      | 473        | 1 053      | 1 344    |
| 1916 . . . . .      | 396     | 151      | 816      | 17       | 431        | 676        | 914      |
| 1917 . . . . .      | 417     | 141      | 848      | 297      | 676        | 1 142      | 1 427    |
| 1918 . . . . .      | 435     | 222      | 921      | 175      | 593        | 1 316      | 1 565    |
| 1919 . . . . .      | 286     | 270      | 949      | 162      | 481        | 1 213      | 1 425    |
| 1920 . . . . .      | 220     | 260      | 936      | 178      | 466        | 1 205      | 826      |
| 1921 . . . . .      | 883     | 178      | 981      | 142      | 460        | 1 145      | 1 469    |
| 1922 . . . . .      | ca. 800 | ca. 200  | 598      | 221      | ca. 500    | 1 112      | 1 825    |
| 1923 . . . . .      | 705     | 143      | 739      | 163      | 473        | 1 080      | 1 621    |
| Gj.snitt<br>1914—23 | 483     | 180      | 837      | 195      | 488        | 1 037      | 1 377    |

Av det hele antall deltagere 6 529 opgis som garnfiskere 4 022, som notfiskere 2 507. Antallet av deltagende farkoster opgis til ialt 2 569 og notlagenes antall til 558.

Om deltagelsen i *høstmakrellfisket i Nordsjøen* henvises til side 34\*.

# Utbytte av de enkelte fiskerier.

## Torskefiskeriene.

(Tabell 6 a og 7 a).

Det samlede utbytte av *skreifiskeriene* i 1923 var 33 200 400 stk. fisk, 137 406 hl. lever, 53 836 hl. rogn samt 24 272 000 stk. fiskehoder til en samlet verdi av kr. 21 176 349. Gjennomsnittsprisen for 100 stk. rund fisk (hode, lever og rogn iberegnet) blir således kr. 63.78.

Utbyttet av *vårtorskefisket i Finnmark fylke (loddefisket)* var i 1923 18 858 444 stk.<sup>1)</sup> fisk, 60 246 hl. lever, 12 531 000 stk. fiskehoder til en samlet verdi av kr. 6 863 658.

Nedenfor følger en tabell, som viser det samlede utbytte av samtlige skreifiskerier og loddefisket i de siste 10 år:

| År               | Vekt tonn <sup>2)</sup> | Stk. fisk, tusen | Lever hl. | Rogn hl. | Samlet verdi kr. | Verdi pr. 100 stk. rund fisk kr. |
|------------------|-------------------------|------------------|-----------|----------|------------------|----------------------------------|
| 1914 . . . . .   | 218 227                 | 79 844           | 144 527   | 65 481   | 31 774 730       | 39.80                            |
| 1915 . . . . .   | 183 075                 | 67 481           | 134 838   | 55 380   | 33 078 906       | 49.02                            |

| 1923 . . . . .   | 161 500                 | 52 059           | 197 652   | 53 836   | 28 040 007       | 53.86                            |
| Gj.snitt 1914—23 | 131 226                 | 46 180           | 124 222   | 43 346   | —                | —                                |
| Gj.snitt 1910—14 | —                       | —                | —         | —        | 25 852 557       | 35.02                            |

Gjennomsnittsfangsten i de siden 1866 forløpne 49 år (til og med 1915) er 53.4 millioner stykker.

Angående de forskjellige landsdeles andel i torskefiskeriens utbytte bemerkes:

*Finnmark fylke.* Der gis tre sett opgaver over Finnmarkens torskefiskerier (hvori deltar fiskere fra Nordland, Troms og Finnmark selv), nemlig (1) „*skreifisket*“ eller *vinterfisket* (fra nyttår til lodde-

<sup>1)</sup> Det bemerkes at fisken i Finnmark og tildels i Troms fylke selges på vekt. Det i statistikken anførte stykketall er fremkommet ved å dividere kilotallene med 2.7 og de derved fremkomne tall er derfor ikke å opfatte som virkelige antall av fisk, men av „normalfisk“ å 2.7 kg. Det virkelige fisketall er i almindelighet meget større i Finnmark, i 1914 f. eks. 40 å 50 mill. stk., i 1915 35 å 40 mill. stk.

<sup>2)</sup> Fra og med året 1914 er vekten beregnet på grunnlag av særlige veininger utført i Ålesund, Lofoten og Finnmarken (se s. 28<sup>3)</sup>), for tidligere år efter forholdet 1 fisk = 2.7 kg. (sløiet fisk uten hode og innvoller).

fiskeopsynet begynner i slutten av april) tab. 6 og 2, (2) „*loddefisket*“ eller *vårtorskefisket* fra slutten av april til utgangen av mai, tab. 7 og 2 og (3) „*sommer- og høstfisket*“ inntil årets utgang, tab. 2, under rubr. „banktorsk“ og fjordtorsk. Denne sonndring blev innført i fiskeristatistikken for 1908. For Finnmarks vedkommende gir opgavene opplysning om vekt av fisken i sløiet tilstand, ikke over stykketall. Følgende tabell gir en oversikt over de to hovedfiskeriers utbytte i de siste 10 år:

| År               | Skreifisket tonn | Loddefisket tonn | Ialt tonn     |
|------------------|------------------|------------------|---------------|
| 1914 . . . . .   | 2 825            | 64 273           | <b>67 098</b> |
| 1915 . . . . .   | 2 808            | 43 346           | <b>46 154</b> |
| 1916 . . . . .   | 2 609            | 22 609           | <b>25 218</b> |

*Troms fylke.* Også i dette fylke selges fisken på vekt og opgavene gjelder vekten av fisken uten hode og hale. Fisket har i de siste 10 år vært mindre end i tidligere år. Følgende tabell viser fangstmengden i de siste 10 år:

|                                |                          |
|--------------------------------|--------------------------|
| 1914 . . . . . 3610 tonn       | 1919 . . . . . 1590 tonn |
| 1915 . . . . . 2378 „          | 1920 . . . . . 1944 „    |
| 1916 . . . . . 2358 „          | 1921 . . . . . 1915 „    |
| 1917 . . . . . 1104 „          | 1922 . . . . . 3070 „    |
| 1918 . . . . . 779 „           | 1923 . . . . . 2322 „    |
| Gjennemsnitt 1914—23 2107 tonn |                          |

*Nordland fylke.* I Lofotens opsynsdistrikt foregår landets største skreifiske. Innen opsynsdistriktet<sup>1)</sup> blev fisket i 1923 17 million stk. skrei. Legges hertil den opfiskede mengde på Yttersiden samt i opsynsdistriktet efter opsynstiden, hvilket tilsammen utgjør 1 941 300 stk. skrei, blir den samlede fangst for Lofoten og Vesterålen 18 953 300 stk. skrei.

<sup>1)</sup> Opsynsdistriktet omfatter fra 1916 også Værøy og Røst.

Innen Lofotens opsynsdistrikt utgjorde fiskernes antall, den samlede fangstmengde og fangstmengden pr. fisker i årene fra og med 1896 som følger:

| År                     | Antall fiskere | Opfisket mengde<br>i tusen stk. | Antall fisk<br>pr. fisker |
|------------------------|----------------|---------------------------------|---------------------------|
| 1896 . . . . .         | 32 280         | 18 000                          | 558                       |

*Fiskens kvalitet.* Bedømt etter levermengden og rognmengden stiller kvaliteten sig således i de siste 10 år, idet tallene i tabellen uttrykker antall liter lever eller rogn pr. 1000 fisk. I siste kolonne er leverholdigheten dessuten uttrykt som antall skrei pr. hl. lever:

<sup>1)</sup> I opsynschefens beretning oppgis noget høiere tall som er fremkommet derved at der til grunn for beregningen er lagt mengde av rogn og fisk på det stadium av fisket da nyttiggjørelsen av rognen ophører. Denne beregningsmåte er vel i og for sig riktigere, men for å kunne sammenligne distriktene er vi her nødt til å legge den hele skreimengde til grunn for beregningen. <sup>2)</sup> For rognens vedkommende er bare skreimengden lagt til grunn for beregningen. <sup>3)</sup> For Troms og Finnmark fylkes vedkommende forståes her ved „1 skrei“ 2.7 kg. sløiet fisk.

Man har ikke fullstendige opgaver over nordmenns utbytte av sildefisket ved Island. Det er betydelig større end hvad den til Norge hjemførte mengde gir uttrykk for.

**Brislingfisket.**

(Tabell 3).

Følgende tabell viser utbyttet av dette fiske i de siste 10 år:

| Gj.snitt 1910—14 | —                        | —          | 1 597 019    | 9.39                                     |

Kystmakrellens gjennomsnittlige vekt anslæes til ca. et tredjedels kilo. Ved veininger utført i nærheten av Lindesnes i 1913 var gjennomsnittsvekten 335 gram.

I spørreskjemane for tidligere år blev mengden opgitt i stykker i det salget i almindelighet forgik pr. stykkeenhet. Dette forhold har imidlertid i de senere år forandret sig således at salget nu foregår pr. kilo. Av hensyn hertil blev spørreskjemaene for 1923 forandret således at man for dette år har fått mengden opgitt i kilo. Det opførte stykketall for 1923 er derfor fremkommet ved å omgjøre kilo til stk. efter det vanlige forhold 1 kg. er = 3 stk.

Med hensyn til mengde og verdiutbytte av makrell i 1917 må der gjøres den bemerkning at de opførte tall ikke er særlig pålidelige. Den måte hvorpå makrellen blev omsatt i nevnte år, medførte nemlig at den opfiskede makrell blev optellet på forskjellige måter og resultatet var at man fik høist forskjellige tall. Det sannsynlige er at verdiutbyttet i 1917 er større end det ovenfor anførte.

*Høstmakrellfisket i Nordsjøen (dorgefisket).* Følgende tabell viser deltagelsen i og utbyttet av dette fiske i tidsrummet fra 1914 til 1916 samt for årene 1919 til 1923. I årene 1917 og 1918 har der grunnet krigsforholdene ingen deltagelse vært i dette fiske fra norsk side.

<sup>1)</sup> I vekten er innkludert 24 628 hl. spir og småmakrell som ikke er medtatt i stykketallet i kolonnen ved siden av.

| Gj.snitt 1910—14 | —                | —         | 910 540   | 100.62            | 2.25        |

Vekten er beregnet etter veininger utført i 1911 og 1912, da vestlandshummeren veiet ca. 500 gram og østlandshummeren ca. 400 gram.

### Østers, vill og opdrettet.

(Tabell 4 b).

Ifølge de meget ufullstendige opgaver som foreligger, har fangsten i de siste 10 år utgjort i verdi:

|           |       |      |      |      |       |       |       |       |      |       |
|-----------|-------|------|------|------|-------|-------|-------|-------|------|-------|

| Verdi kr. | 12435 | 2050 | 1119 | 6635 | 14610 | 23530 | 14530 | 33395 | 7355 | 24710 |

## De øvrige fiskerier.

(Tabell 2, 4 og 4 b).

Før 1908 angas kun det samlede verdiutbytte under rubrikken „Andre fiskerier“. Fra 1908 av angis såvel fangstmengde som verdi av de viktigste fiskesorter som inngikk derunder, fra 1914 også for de sjeldnere sorter forsåvidt opplysninger foreligger.

Nedenfor en tabell over mengde, verdi og priser siden 1914.

| Art                    | 1914          |                      |                            | 1915          |                      |                            | 1916          |                      |                            |

### Håkjerringfiske.

(Tabell 4 b.)

Resultatet av dette fiske i 1923 var 1 934 hl. lever til en verdi av kr. 58 225. Herav faller på Nordland fylke 42 hl., verdi kr. 1 240, Troms fylke 1 100 hl., verdi kr. 28 000 og på Finnmark fylke 792 hl. til en verdi av kr. 28 985.

### Selfangst m. v. i polaregnene.

Fra *Hammerfest* deltok 9 fartøier av tilsammen 497 tonn (netto drektighet) og med en samlet besetning av 109 mann. To fartøier gjorde 2 turer, de øvrige kun 1. Fangstutbytte: 14 599 stk. sel, 796 storkobber, 536 klappmyss, 92 hvalross 91 isbjørn, 70 518 kg. skinn og 250 252 kg. spekk. Fangstens samlede verdiutbytte utgjorde kr. 250.229.

Fra *Tromsø* inn- og utklarertes efter tollvesenets opgaver 120 fartøier. De fleste av dem har gjort flere turer. Den samlede fangst utgjorde 100.013 stk. sel, 3 126 storkobber, 6 599 klappmyss, 66 hvalross, 362 døde og 54 levende isbjørn, 50 snadd, 55 reinsdyr, 51 hvitfisk, 300 „gris“, 84 revskinn og 2 levende rev, 5 reinskinn, 50 snaddskinn, 36 kg. dun og 17 691 tnr. spekk. Fangstverdien er opgitt til kr. 1 707 670

1) Ved utregning av gj.snittspris er levermengde av skrei og loddetorsk fratrukket, da verdien derav ikke er medtatt her.

Fra *Kristiansund* tollsted er utklarert og innklarert ett fartøi. Fangsten utgjorde 900 stk. sel og 700 stk. klappmyss; spekkmengden 40 000 kg. Samlet fangstverdi kr. 28 000.

Fra *Ålesund* og *Sunnmøre* deltok 46 fartøier. Flere av disse har innklarert i Tromsø hvorfor fangstene for deres vedk. er medtatt i oppgavene derfra. Fangsten som blev levert i Ålesund og distriktene deromkring utgjorde 110 431 stk. skinn, 5 levende og 27 døde isbjørne. Spekkmengde 2 661 900 kg. Samlet verdi ca. kr. 2 134 000.

Til *Blomvåg pr. Bergen* blev bragt 9 634 stk. skinn til en verdi av kr. 73 110, 132 320 kg. olje, verdi kr. 116 445. Samlet verdi kr. 189 555.

Det samlede verdiutbytte av denne fangstvirksomhet utgjør således kr. 4 309 454.

### Nebbhvalfangst.

Bottlenosefangsten har for Ålesund og Sunnmøres vedkommende vært drevet av 5 dampskibe og 4 motorbåter og disse har innbragt en samlet fangst av 130 stk. bottlenoser. De opfiskede bottlenoser gav et utbytte av 169 000 kg. spekk og 12 000 kg. kjøtt der utbragte en samlet verdi av kr. 67 550.

### Hvalfangst.

Følgende tabell gir en oversikt over hvalfangsten i 1923.

| Nordfeltene           | Antall    |       |              |      |          |
|-----------------------|-----------|-------|--------------|------|----------|

## Fisk til husbehov.

(Tabell 10).

Det store forbruk av fisk langs kysten, fisket av forbrukerne selv, er ikke medtatt i tabell 2—8. Ifølge opgavene var verdien av denne fisk i 1923 kr. 3 562 755. Det vil forståes at disse beløp må betraktes som rent anslagsvise og i sin almindelighet sett er for lavt ansett. Selv om man bare regner verdien av et individs årsforbruk av fisk

1) For nordfeltene og sydfeltene tilsammen blev fanget 8 550 hval.

til 20 kr., kommer man op i mere enn det dobbelte av det her opførte tall. Man går da ut fra den antagelse, at ca. en femtedel av rikets innbyggere bor således til at de selv kan fiske alt eller nesten alt de selv spiser, av fisk. I skjemaene for 1914 og senere år blev der spurt også om makrell, uer og sei foruten skrei, loddetorsk og sild som tidligere års skjemaer også spurte om.

For de forskjellige fiskearters vedkommende stiller forbruket sig således:

|                       |              |                |                     |         |            |
|-----------------------|--------------|----------------|---------------------|---------|------------|
| Skrei.....            | 875 100 stk. | verdi kr.      | 557 557             | pr. kg. | 19 øre     |
| Loddetorsk.....       | 344 900 kg.  | — „            | 37 493              | —       | 11 „       |
| Annen torsk.....      | 2 415 500 „  | — „            | 693 333             | —       | 29 „       |
| Sild.....             | 85 558 hl.   | — „            | 620 587             | —       | 7 „        |
| Makrell.....          | 486 400 stk. | — „            | 161 215             | —       | 33 „       |
| Uer.....              | 479 200 kg.  | — „            | 161 231             | —       | 34 „       |
| Sei.....              | 2 381 200 „  | — „            | 443 305             | —       | 19 „       |
| Ikke særs. nevnte ca. | 4 440 000 „  | — „            | 888 034             | —       | ca. 20 „   |
| Ialt ca.              |              | 21 988 000 kg. | verdi kr. 3 562 755 | pr. kg. | ca. 16 øre |

### Utlendingers fangst.

Til Kristiansand blev der i 1923 av svenske fartøier som ialt gjorde 64 turer ilandbragt ialt 4 465 tnr. nordsjømakrell. Prisen var kr. 1.30 — 1.10 — 0.90 og 0.70 pr. kg. for henholdsvis nr. 2, 3, 4 og 5.

Til Oslo blev av svensker og dansker bragt fisk til en verdi av kr. 3 604 017, hvorav torsk til en verdi av kr. 2 563 032 og makrell til kr. 597 850.

### Fiskefartøier, redskaper og anlegg.

(Tabell 1 a og 1 b).

*Fiskefartøier.* Nedenfor gis en oversikt for de siste 10 år over antallet av fiskefarkoster hjemmehørende i riket av de forskjellige klasser. Opgaver over fiskefarkoster blev for første gang innhentet i 1906 og spørsmål herom er gjentatt regelmessig i spørreskjemaene fra 1908 av.

I spørreskjemaene for 1921 og senere har man ikke spurt om seilfartøier, motorfartøier eller dampskibe. For disse år har man nemlig forsåvidt nevnte fartøier angår benyttet opgavene som er inntatt i „Fortegnelsen over merkepliktige norske fiskefarkoster“.

For 1922 og 1923 er der ikke foretatt noen verdiberegning av fiskefarkostene.

|   | 1914         | 1915         | 1916         | 1917         | 1918          | 1919          | 1920          | 1921          | 1922                | 1923  |

*Redskaper.* (Tabell 1 b). I 1914 blev gjort det første forsøk på å offentliggjøre opgavene over antall av forskjellige slags redskaper og deres verdi. Det har vært nødvendig å innhente en hel del supplerende opplysninger fra lensmennene, som med stor beredvillighet har gitt alle forlangte opplysninger. Her anføres antall av de viktigste redskaper for 1923:

|                                |       |                         |         |
|--------------------------------|-------|-------------------------|---------|
| Kilenøter . . . . .            | 6 313 | Garn for sild . . . . . | 298 033 |
| Snurpenøter for sild . . . . . | 350   | — „ torsk . . . . .     | 436 641 |
| — „ brisling.. . . .           | 217   | — „ makrell . . . . .   | 41 505  |
| Stengenøter for sild. . . . .  | 2 843 | Reketråler. . . . .     | 331     |
| — „ brisling... . . .          | 2 785 | Teiner. . . . .         | 214 699 |
| — „ sei o.a.fisk . . . . .     | 2 924 | Ruser . . . . .         | 18 182  |
| Synkenøter for sei . . . . .   | 1 305 |                         |         |

Dessuten var der andre redskaper (liner, bunngarn o. s. v.) til en samlet verdi av kr. 10 429 500 (i 1922 kr. 7 466 260).

Den samlede verdi av alle fiskeredskaper var kr. 47 492 030, i 1922 kr. 45 475 789, i 1921 kr. 56 088 928 og i 1920 kr. 68 215 372.

*Anlegg på land.* (Tabell 1 b). Også for å få disse oppgaver har det vært nødvendig å stille forespørsler til mange kanter og ved manges velvilje er der bøtet meget på ufullstendigheten i de oprindelige oppgaver.

<sup>1)</sup> Doryer og fangstbåter.

Her anføres antall av

|  | 1918   | 1919   | 1920   | 1921   | 1922              | 1923              |

### Fiskerikapitalen.

For 1922 og 1923 har man kun opgaver over verdien av redskaper. For 1923 utgjorde verdien herav kr. 47 492 030. Verdien av fiskefarkoster og anlegg på land er ukjent.

Man hitsetter imidlertid den samlede størrelse av den i fiskeribedriften og fisketilvirkningen nedlagte kapital for årene 1919, 1920 og 1921 som etter ovenstående skulde bli:

|                          | 1919<br>kr.        | 1920<br>kr.        | 1921<br>kr.        |
|--------------------------|--------------------|--------------------|--------------------|
| Fiskefartøier . . . . .  | 138 063 907        | 116 807 820        | 113 291 730        |

### Hvad der ikke er medtatt.

I statistikken er ikke medtatt endel verdier, som efter sin natur like godt kunde være medtatt som de anførte, men som man ikke har trodd å kunne få brukbare opgaver over. Dette gjelder således det svære hjellbruk, som finnes overalt hvor større torskefiske foregår, anlegg til tørking av klippfisk, den store mengde av lagerhus i by

<sup>1)</sup> Derunder „salterier, guanofabrikker“ m. m.

<sup>2)</sup> Efter Industristatistikken.

<sup>3)</sup> I tidligere år innbefattet under gruppen „andre“.

og på land, som helt eller delvis tjener til lagring av fiskevarer. Ennvidere den store flåte av transportfartøier av alle slags, som fører salt fisk på kysten; jagter, galeaser, jekter, skøiter og slupper, som fører saltfisk fra skreidistriktene til tørkeplassene i Nordland, Trøndelagen o. s. v. og atter frakter den ferdige klippfisk til eksportbyene. Endelig den flåte av dampskiber, som en stor del av året er optatt med å føre fersk fisk (vesentlig sild) fra norske fiskefelter til utenlandske havner.

---

### Fiskenavn etc.

For å undgå tvetydighet med hensyn til de i statistikken omtalte fiskarter og til rettledning for utenlandske lesere tilføies efter tabellverket en liste over fiskenavnene med deres zoologiske betegnelser samt deres engelske og franske navner.

---
